This is the 10th of a series of 12 weekly messages brought to you by the well known individuals, business firms, industries, labor groups, churches and others whose names you see listed on this page—people of your own community, who share a common bond and a great heritage as your fellow Americans. They feel, as you do, that to stoutly resist the infiltration of various isms in our homes, schools, churches, industries, labor groups, clubs and associations, one must have a broad basis of understanding of the American Economic System which has brought us the highest standard of living while preserving our fundamental freedom and security. In presenting these thought-provoking messages, they are fighting your battle. Let them know that they, too, have your support so that the unity of America may be an accomplished fact and not merely something to be desired in time of peril.
